JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 219 (1987)

SUBJECT INDEX

Anthraquinone,
behaviour of some poly(pyrrole–———) films in DMSO electrolytes (Audebert et al.) 165

Aromatic molecules,
solvent and ion pairing effects on the reaction entropy for the electroreduction of —— (Jaworski) 209

Berberine,
square-wave voltammetry of ——— (Komorsky-Lovrić) 281

Carbon,
electrochemical behavior of iron–1,10-phenanthroline complexes at a ——— paste electrode (Luque de Castro et al.) 139

Carbon dioxide,
an electroanalytical investigation on the nickel-promoted electrochemical conversion of CO_2 to CO (Daniele et al.) 259

Carbon monoxide,
an electroanalytical investigation on the nickel-promoted electrochemical conversion of CO_2 to CO (Daniele et al.) 259

Complex compounds,
conversions of ——— and quinone on surface-modified electrodes (Gudavičius et al.) 153

Copper,
an in situ study of the mechanism of the electrochemical dissolution of ——— in oxygenated sulphuric acid. An application of the quartz microbalance (Schumacher et al.) 311

Diffusion–migration impedances,
——— for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses (Buck) 23

Dimethylformamide,
heterogeneous one-electron exchange of silicotungstic heteropolyanion in ——— (Keita, Nadjo) 355

Dimethylsulphoxide,
behaviour of some poly(pyrrole–anthraquinone) films in ——— electrolytes (Audebert et al.) 165

ECE mechanism,
chronopotentiometry at a dropping mercury electrode. Effect of electrode sphericity on the potential–time curves and the transition times of an ——— (Galvez, Zapata) 13
Chronopotentiometry with programmed current at an electrode expanding with any power law. Theoretical study of an ——— (Galvez et al.) 1

Electrode sphericity,
chronopotentiometry at a dropping mercury electrode. Effect of ——— on the potential–time curves and the transition times of an ECE mechanism (Galvez, Zapata) 13

Gold,
organized self-assembling monolayers on electrodes. Part I. Octadecyl derivatives on ——— (Sabatani et al.) 365
Supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/leucomethylene blue redox couple at the ——— electrode (Žutić et al.) 183

Graphite,
studies of protein–electrode interactions by organosilyl derivatisation of pyrolytic ——— electrodes (Armstrong, Brown) 319

Halide media,
SERS investigation of interfacial Pb(II) species in weakly acidic aqueous ——— (Coria-Garcia et al.) 291

Halobenzenes,
on the electroreduction mechanism of ———. Part I. A quantum chemical approach (Casado et al.) 197
Hydrogen,
extraordinary temperature effect on the —— electrode potential in concentrated perfluoralkanesulfonic acids (Atanasoski et al.) 347

Iodine,
hydrogenative/cathodic stripping of ——— chemisorbed on smooth polycrystalline platinum electrodes (Mebrahtu et al.) 327
Ion pairing effects,
solvent and ——— on the reaction entropy for the electroreduction of aromatic molecules (Jaworski) 209
Iron,
electrochemical behavior of ———-1,10-phenanthroline complexes at a carbon paste electrode (Luque de Castro et al.) 139
Electrochemical oxidation of the tris-1,10-phenanthroline ———(II) cation in the presence of sodium dodecylsulfate (Lemordant) 125

Ladder polymer,
electrochemical preparation of a ——— containing phenazine rings (Chiba et al.) 117
Lead,
SERS investigation of interfacial Pb(II) species in weakly acidic aqueous halide media (Coria-Garcia et al.) 291
Leucomethylene blue,
supramolecular phenomena in organic redox films at electrodes. Part II. The methylene blue/——— redox couple at the gold electrode (Žutić et al.) 183
Lithium,
cathodic decomposition of propylene carbonate in ——— batteries (Arakawa, Yamaki) 273

Membrane cells,
diffusion–migration impedances for finite, one-dimensional transport in thin-layer and ———. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses (Buck) 23
Mercury,
chronopotentiometry at a dropping ——— electrode. Effects of electrode sphericity on the potential–time curves and the transition times of an ECE mechanism (Galvez, Zapata) 13
Electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects (Ryan et al.) 247
Methylene blue,
supramolecular phenomena in organic redox films at electrodes. Part II. The ———/leucomethylene blue redox couple at the gold electrode (Žutić et al.) 183
Monolayers,
organized self-assembling ——— on electrodes. Part I. Octadecyl derivatives on gold (Sabatani et al.) 365

Nickel,
an electroanalytical investigation on the ———-promoted electrochemical conversion of CO_2 to CO (Daniele et al.) 259

Octadecyl,
organized self-assembling monolayers on electrodes. Part I. ——— derivatives on gold (Sabatani et al.) 365
Organosilyl derivatisation,
studies of protein–electrode interactions by ——— of pyrolytic graphite electrodes (Armstrong, Brown) 319
Osmium,
diffusion–migration impedances for finite, one-dimensional transport in thin-layer and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses (Buck) 23

Perfluoroalkanesulfonic acids,
extraordinary temperature effect on the hydrogen electrode potential in concentrated ——— (Atanasoski et al.) 345
Pertechnetate,
mechanism and kinetics of the stepwise voltammetric reduction of ——— in alkaline solution to Tc(VI), Tc(V) and Tc(IV) (Founta et al.) 221
1,10-Phenanthroline,
electrochemical behavior of iron–———-complexes at a carbon paste electrode (Luque de Castro et al.) 139
Electrochemical oxidation of the tris-———

cation in the presence of sodium dodecylsulfate (Lemordant) 125
Phenazine,
electrochemical preparation of a ladder polymer containing ——— rings (Chiba et al.) 117
Platinum,
hydrogenative/cathodic stripping of iodine chemisorbed on smooth polycrystalline —— electrodes (Mebrahtu et al.) 327
Polyaniline,
spectroelectrochemical study of ———: the construction of a pH–potential phase diagram (Cushman et al.) 335
Polyvinylferrocene,
chemical and mechanical properties of redox polymer-modified electrodes. Part III. Redox thermodynamics of linear ——— electrodes (Bowden et al.) 91
Propylene carbonate,
cathodic decomposition of ——— in lithium batteries (Arakawa, Yamaki) 273
Protein,
studies of ———-electrode interactions by organosilyl derivatisation of pyrolytic graphite electrodes (Armstrong, Brown) 319
Pyrrole,
behaviour of some poly(———-anthraquinone) films in DMSO electrolytes (Audebert et al.) 165

Quartz microbalance,
an in situ study of the mechanism of the electrochemical dissolution of copper in oxygenated sulphuric acid. An application of the ——— (Schumacher et al.) 311
Quinone,
conversions of complex compounds and —— on surface-modified electrodes (Gudavičius et al.) 153

Redox polymer,
chemical and mechanical properties of ——-modified electrodes. Part I. A mechanical/electrochemical model (Bowden et al.) 49
Chemical and mechanical properties of ——-modified electrodes. Part III. Redox thermodynamics of linear polyvinylferrocene electrodes (Bowden et al.) 91
Chemical and mechanical properties of ——-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized vinylferrocene electrodes (Dautartas et al.) 71

Silicotungstic heteropolyanion,
heterogeneous one-electron exchange of —— in dimethylformamide (Keita, Nadjo) 355
Sodium dodecylsulfate,
electrochemical oxidation of the tris-1,10-phenanthroline iron(II) cation in the presence of ——— (Lemordant) 125
Solvent effects,
——— and ion pairing effects on the reaction entropy for the electroreduction of aromatic molecules (Jaworski) 209
Sulphuric acid,
an in situ study of the mechanism of the electrochemical dissolution of copper in oxygenated ———. An application of the quartz microbalance (Schumacher et al.) 311

Technetium,
mechanism and kinetics of the stepwise voltammetric reduction of pertechnetate in alkaline solution to Tc(VI), Tc(V) and Tc(IV) (Founta et al.) 221
Tetraalkylammonium,
electrogenerated $R_4N(Hg)_5$ films: stoichiometry and substituent effects (Ryan et al.) 247
Thin-layer cells,
diffusion–migration impedances for finite, one-dimensional transport in ——— and membrane cells. Part II. Mixed conduction cases: Os(III)/Os(II)ClO_4 polymer membranes including steady-state I–V responses (Buck) 23

Vinylferrocene,
chemical and mechanical properties of redox polymer-modified electrodes. Part II. Redox thermodynamics of plasma-polymerized —— electrodes (Dautartas et al.) 71
